# SUPER CHANGE™

## FAST & EASY R22 SYSTEM RETROFIT

 MINERAL/AB OIL  
SUPER CHANGE™  
HFC REFRIGERANT

- / Links Mineral/AB oil to any HFC refrigerant
- / Eliminates oil change requirements
- / Replaces R22 line set conversion flush
- / Boosts oil return & heat transfer

### WHAT IS SUPER CHANGE™?

SUPER CHANGE™ allows for a fast & easy conversion from R22, or any mineral/alkylbenzene oil systems, to HFC refrigerants, including POE-based R407C & R410A.

### HOW DOES IT WORK?

SUPER CHANGE™ creates a strong compatibility link between mineral/alkylbenzene oils & HFC refrigerants. No changing of the oil, "O" rings, or gaskets is required, eliminating compressor downtime & line set flush.

### OTHER BENEFITS:

- Boosts efficiency & extends compressor life
- Maximizes heat transfer & oil return with drop-in refrigerants
- Reduces oil logging - critical in systems with long line set runs & rises
- Reduces corrosion & restores lubricant to original condition by removing water & oxygen
- Rejuvenates components by eliminating moisture
